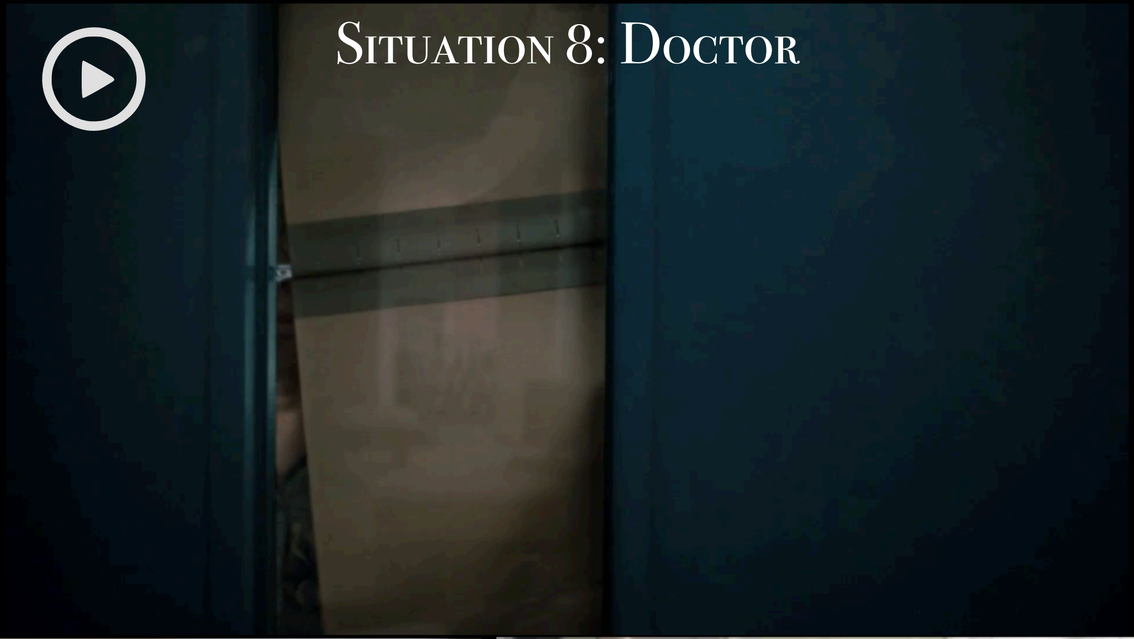
Situation 8: Doctor



Nervous. He says, *"I am completely fine."* He holds the doctors hands across the table, he micro-adjusts his palm angle.. Doctor waits. He re-clasps the doctor's hand with a thumb reposition..Doctor puts his hand on top… rotates his wrist 4 degrees clockwise. Slow. Ritualistic. They lock eyes. A long, knowing silence. The doctor holding his own affliction hidden. The camera tracks out, from the cabin. **Super: Symptom 3 Denial. Super changes and VO kicks in: There is no cure once….** Nurse politely speaks ***"You have golf on your mind."*** **Super appears:** ***"you've got Golf On The Mind."***

Situation 8: Doctor

We see an expression of the doctor, withholding his own affliction. Followed by a flash of GOTM LOGO. **The GOTM Syndrome.** ~~Super and VO: But there can be relief. *(High point to this is missing to fix.)*~~
